Legal Notice: The components of the New Jersey Hospital Association's (NJHA) pandemic flu planning resources (hereinafter "materials") are intended to be tools to assist hospitals in developing their pandemic preparedness and response plans. Your hospital's pandemic preparedness plan should be tailored to meet your specific needs and should be created after thorough evaluation of the challenges a pandemic may create for your particular organization whether or not such potential challenges are identified in these materials. Like any printed resources, these materials may not be complete, may become out of date over time and/or may need to be revised or updated.

These materials are intended to serve as a planning tool and are not intended to constitute a standard of care. The information contained these materials is derived from multiple parties and sources and accordingly NJHA disclaims any and all responsibilities and /or warranties with respect to the extent to which these materials will allow you to assess your hospital's level of pandemic preparedness, patient care or employee protection. No specific representation is made, nor should be implied, nor shall NJHA or any other party involved in creating, producing or delivering this material be liable in any manner whatsoever for any direct, incidental, consequential, indirect or punitive damages arising out of your use of these materials.

NJHA makes no warranties or representations, express or implied, as to the accuracy or completeness of the information contained or referenced herein. This publication is provided "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE, OR NON-INFRINGEMENT. Some jurisdictions do not allow the exclusion of implied warranties, so the above exclusion may not apply to you.

All images and information contained in these materials are copyrighted and otherwise proprietary. No use of this information is permitted without the prior written consent of NJHA.

ACKNOWLEDGEMENTS

NJHA's *Planning Today for a Pandemic Tomorrow* resource is supported by a grant from Roche Pharmaceuticals. The module is intended to serve as a planning tool and is not intended to constitute a standard of care, nor does it constitute legal advice. As such, a hospital's pandemic preparedness plan should be tailored to meet its specific needs.

INTRODUCTION

Through the use of a detailed assessment and planning tool, hospitals can review existing policies and procedures, identify gaps, adopt new policies and procedures and generate a pandemic influenza plan that will facilitate a more effective response during a crisis. This tool will assist hospitals in developing and adopting new policies that will be required to protect employees, patients and the hospital itself. The planning and assessment tool identifies critical elements within each module related to hospital operations during an emergency situation. In addition, the tool provides a variety of sample policies and procedures that facilities may elect to use in their planning process.

Critical areas to address when planning for a pandemic include:

Clinical Care	Leadership
Communication	Legal/Regulatory
Ethics	Operations
Finance	Psycho-Social
Human Resources	Supplies/Logistics/Support Services

How to Use This Module

Hospitals should form multi-disciplinary work teams to develop policies and procedures relating to each of the critical areas identified above. Diverse perspectives will help ensure that all issues or concerns that may be raised during a pandemic can be brought to the table while in the planning process.

The modules are to be used as a guide to facilitate discussion and to ensure that key points related to a topic such as human resources are identified and addressed in the planning process. Sample policies and/or procedures are provided; these policies and procedures are by no means all inclusive, and hospitals should not interpret the sample policies as what *must* be adopted. Sample policies are provided to assist a hospital in developing a policy that is consistent with the culture and values of the organization. Hospitals are not required to adopt any of the sample policies and procedures; they are intended simply to serve as a resource and guide in the planning process. *They are not reflective of a standard of care.*

Upon completion of the 10 modules reflected in *Planning Today for a Pandemic Tomorrow*, a "cross-walk" will be developed. This cross-walk will provide guidance for other module areas that should be referenced when developing policies and procedures. For example, when examining a Human Resources policy, the Legal and Regulatory module may need to be reviewed.

And finally, the information reflected in the planning and assessment tool modules is intended to be used as a fluid and flexible resource in dealing with the problems associated with a pandemic influenza outbreak. It is based on existing information, therefore hospitals should routinely review their plan to ensure new information is incorporated into policies and procedures as necessary.

OPERATIONS MODULE

NOTE: Many areas in the “Operations” module overlap with the “Clinical Operations” module. They may be mentioned more than once.

In the sections that follow, a series of planning/policy tasks are broken down by operations expertise areas. They are discretionary and are representative of the issues that *should* be considered. These tasks include:

- A. Organizing a Pandemic Planning Committee
- B. Creating an Emergency Management Plan (EMP)
- C. Establishing an Emergency Operations Center (EOC)
- D. Adopting a NIMS-Compliant Incident Management System
- E. Risk Assessment and Business Impact Analysis
- F. Community Planning Integration
- G. Resource Sharing
- H. Stockpile Development
- I. Alternate Care Sites
- J. Securing the Facility
- K. Mortuary Services
- L. Post-Pandemic Recovery

Associated with each section are appendices and/or suggestions to refer to other toolkit modules that offer additional details, tips and/or further explanation of important considerations for each task. Careful planning in these areas will assure that operations run smoothly under the extreme conditions of a pandemic.

A. ORGANIZING A PANDEMIC PLANNING COMMITTEE

In your plan, consider the following:

	ASSIGNMENT	COMPLETED	IN PROGRESS	NOT STARTED	DATE TO BE COMPLETED	LEAD STAFF MEMBER
1	Identify staff to serve on the facility's pandemic flu planning committee such as: ✓ Emergency preparedness coordinator ✓ Chief finance officer ✓ Human resources executive ✓ Public information officer ✓ Facility management executive ✓ Security executive ✓ VP of nursing ✓ Senior management executive ✓ Medical staff representative ✓ Ethics representative ✓ Employee health representative ✓ General counsel ✓ Supplies representative ✓ Pharmacy representative ✓ Information systems representative ✓ Infection control professional					
2	Ensure the charge of the pandemic flu planning committee includes deadlines for completion.					
3	Ensure inclusion of staff that are fully educated about state and federal regulations/guidelines that are applicable to a pandemic.					

B. CREATING AN EMERGENCY MANAGEMENT PLAN (EMP)

In your plan, consider the following:

	ASSIGNMENT	COMPLETED	IN PROGRESS	NOT STARTED	DATE TO BE COMPLETED	LEAD STAFF MEMBER
1	Develop an emergency management plan (EMP) that is compliant with the National Incident Management System (NIMS).					
2	Ensure the EMP outlines: <ul style="list-style-type: none"> ✓ Initial assessment process ✓ EMP implementation triggers ✓ The process for implementing the EMP including: <ul style="list-style-type: none"> • Who has authority to activate • Who gets notified and how • Initial steps to be taken ✓ An implementation matrix detailing triggers and associated key actions to be taken by departments across the facility ✓ Activation of the emergency operations center (EOC – physical or virtual, depending upon the situation) and activation of the Incident Management System ✓ Process for maintaining prolonged EOC operations ✓ A secondary location for EOC ✓ De-escalation of event and shutting down of EOC 					
3	Ensure facility exercises its EMP as required by established standards within the healthcare community.					

B. CREATING AN EMERGENCY MANAGEMENT PLAN (EMP) CONTINUED

	ASSIGNMENT	COMPLETED	IN PROGRESS	NOT STARTED	DATE TO BE COMPLETED	LEAD STAFF MEMBER
4	Ensure plan has explicit policies/procedures for communicating with patients, staff, etc. (See Communications module)					
5	Encourage staff to develop personal emergency response plans. (See HR module)					

C. ESTABLISHING AN EMERGENCY OPERATION CENTER (EOC)

In your plan, consider the following:

	ASSIGNMENT	COMPLETED	IN PROGRESS	NOT STARTED	DATE TO BE COMPLETED	LEAD STAFF MEMBER
1	Identify primary and secondary locations for your EOC.					
2	Ensure EOC is equipped with: <ul style="list-style-type: none"> ✓ Multiple phone lines ✓ Fax – both incoming and outgoing ✓ Computers and printers ✓ E-mail capabilities ✓ Internet and web access ✓ Any necessary radio communication devices ✓ Cell phone service, if possible ✓ Office supplies to sustain a prolonged operation ✓ Backup supplies of toner, printer cartridges, copy paper, etc. 					
3	Ensure EOC can completely operate on emergency power.					
4	Develop specific triggers identifying when to open your EOC.					
5	Develop processes for standing up the EOC, including: <ul style="list-style-type: none"> ✓ Who has the authority to open the EOC ✓ How to set up the room ✓ How to set up required equipment ✓ Who to notify when the EOC is opened 					

C. ESTABLISHING AN EMERGENCY OPERATION CENTER (EOC) CONTINUED

	ASSIGNMENT	COMPLETED	IN PROGRESS	NOT STARTED	DATE TO BE COMPLETED	LEAD STAFF MEMBER
6	<p>Establish positions within the EOC (e.g., public information officer, safety officer, etc.) ensure the are consistent with Incident Command System or Hospital Incident Command System (ICS/HICS) and ensure:</p> <ul style="list-style-type: none"> ✓ People filling the positions have had adequate training ✓ Responsibilities for each officer position is reflected in corresponding job action sheet ✓ All positions have staff assigned to ensure three deep coverage <p>See Appendix C</p>					
7	<p>Develop processes to run a virtual EOC when face-to-face meetings are not allowed due to social distancing. Include:</p> <ul style="list-style-type: none"> ✓ Identification of required technology and equipment ✓ Protocols on how to conduct virtual meetings ✓ Practice exercises for virtual EOC operation 					

C. ESTABLISHING AN EMERGENCY OPERATION CENTER (EOC) CONTINUED

	ASSIGNMENT	COMPLETED	IN PROGRESS	NOT STARTED	DATE TO BE COMPLETED	LEAD STAFF MEMBER
8	Maintain a current contact list for other important EOCs in the area, including: ✓ Emergency contact names and numbers for surrounding health care organizations and their EOC numbers ✓ Contact information for regional EOCs and local and regional emergency management offices (OEM's) ✓ Critical health department contact names and telephone numbers ✓ Contact information for EOCs at key suppliers (if available)					
9	Discuss and agree upon policies and procedures to support other facility EOCs.					
10	Develop arrangements/memoranda of understanding (MOUs) to share staff and supplies with other facility EOCs.					
11	Develop system to document all decisions, processes and pathways used and developed in the EOC.					
12	Develop process to efficiently share critical decisions, processes and pathways developed in the EOC.					
13	Develop procedures to provide support to EOC staff for prolonged periods of time (e.g., food, sleeping areas, bathroom and shower facilities, etc.).					

D. ADOPTING A NIMS-COMPLIANT INCIDENT MANAGEMENT SYSTEM

In your plan, consider the following:

	ASSIGNMENT	COMPLETED	IN PROGRESS	NOT STARTED	DATE TO BE COMPLETED	LEAD STAFF MEMBER
1	<p>Adopt an emergency management plan that is National Incident Management System (NIMS)-compliant that includes:</p> <ul style="list-style-type: none"> ✓ Adoption of a formalized incident management system (e.g, ICS or HICS) for use in managing a pandemic ✓ Training for all staff to the level required by NIMS ✓ Pre-identification of command staff and section chief positions that are at least three people deep (four-to-six deep is better as a pandemic will be a prolonged event) ✓ Development of job action sheets or checklists for all positions within the EOC ✓ Development of a plan to internally exercise the incident management system at least twice a year. ✓ Development of a plan to externally exercise the incident management system with community partners at least once a year. This includes the concept of unified command. <p>See Appendix D</p>					
2	Cross-train staff to assume command and general staff positions.					
3	Ensure staff knows how to integrate the facility ICS structure into the city/county/state structure.					
4	Ensure staff exercises their ICS structure with their community partners at least annually.					

D. ADOPTING A NIMS-COMPLIANT INCIDENT MANAGEMENT SYSTEM CONTINUED

	ASSIGNMENT	COMPLETED	IN PROGRESS	NOT STARTED	DATE TO BE COMPLETED	LEAD STAFF MEMBER
5	Unified command is discussed with community partners; roles should be identified and agreed upon.					
6	Create effective system to document all decisions, processes and pathways for use in the EOC, including: <ul style="list-style-type: none"> ✓ Procedure to share critical decisions, processes and pathways with management, staff, patients and visitors ✓ Procedures to share critical decisions with media/outside agencies ✓ Staff practice exercises of ICS ✓ Operational briefings and change of command exercises 					

E. RISK ASSESSMENT AND BUSINESS IMPACT ANALYSIS

In your plan, consider the following:

	ASSIGNMENT	COMPLETED	IN PROGRESS	NOT STARTED	DATE TO BE COMPLETED	LEAD STAFF MEMBER
1	Ensure pandemic flu is addressed in the facility's hazard vulnerability analysis (HVA).					
2	Develop and perform a business impact analysis (BIA) to address upstream and downstream dependencies for critical services that will be maintained during a pandemic, including: <ul style="list-style-type: none"> ✓ Questionnaire development ✓ Information collection ✓ Interviews with key stakeholders See Appendix E-1					
3	Ensure that information technology (IT) systems are addressed. Develop recovery time objectives (RTOs) and recovery point objectives (RPOs) for critical clinical systems, processes and data. See Appendix E-2					

F. COMMUNITY PLANNING INTEGRATION

In your plan, consider the following:

	ASSIGNMENT	COMPLETED	IN PROGRESS	NOT STARTED	DATE TO BE COMPLETED	LEAD STAFF MEMBER
1	Ensure facility participates in community planning efforts so that facility plans are integrated into community plans.					
2	Participate in local emergency planning committee (LEPC) activities.					
3	Participate in state, county/parish and local government planning activities.					
4	Coordinate planning efforts with local law enforcement.					
5	Participate in regional public health pandemic planning activities.					
6	Include public health representation on the facility's pandemic planning committee.					
7	Collaborate with city, county and state officials in developing public service announcements.					
8	Determine most appropriate contact and most effective means of communication with city, county and state officials.					

F. COMMUNITY PLANNING INTEGRATION CONTINUED

	ASSIGNMENT	COMPLETED	IN PROGRESS	NOT STARTED	DATE TO BE COMPLETED	LEAD STAFF MEMBER
9	Collaborate with local law enforcement to develop plans that address the increased security needs for the hospital during a pandemic and the police resources that would be available to meet those needs. For example, increased security needs may result from agitated family members, stressed staff members, shortages of critical supplies, etc. Community law enforcement resources may be stretched thin by absenteeism and other pressing community needs.					

G. RESOURCE SHARING

In your plan, consider the following:

	ASSIGNMENT	COMPLETED	IN PROGRESS	NOT STARTED	DATE TO BE COMPLETED	LEAD STAFF MEMBER
1	Develop process and associated policies for sharing resources with other health care facilities in the region.					
2	Ensure resource sharing policies address: <ul style="list-style-type: none"> ✓ Methods for sharing resources ✓ Training on the safe use of shared resources (include internal training for incoming items and external training for recipients of your resources) ✓ Liability issues for shared equipment (i.e., if someone is injured by equipment, who assumes responsibility – the sending or receiving facility?) ✓ Insurance concerns (e.g., will coverage or warranties apply if equipment or other resources/supplies are utilized by another facility at an alternate location?) ✓ Care and upkeep of shared equipment ✓ Financial considerations for shared equipment (e.g., will there be a charge for using borrowed equipment; if items are destroyed or lost, what is the reimbursement policy, etc.) 					
3	Develop an inventory of resources that could be shared with other health care organizations during a pandemic.					

H. STOCKPILE DEVELOPMENT

In your plan, consider the following:

	ASSIGNMENT	COMPLETED	IN PROGRESS	NOT STARTED	DATE TO BE COMPLETED	LEAD STAFF MEMBER
1	<p>Assess the needs and develop plan for personal protective equipment (PPE), including:</p> <ul style="list-style-type: none"> ✓ Identify which PPE would be in high demand for your facility (i.e., masks, respirators [N-95, PAPRs, etc.], gloves, gowns, goggles, face shields) and estimating what that demand would be ✓ Identify if facility will stockpile PPE ✓ Develop procedures for rotation and maintenance of stockpiled PPE ✓ Maintain current inventory of stockpiled PPE ✓ Identify alternate/backup PPE suppliers ✓ Ensure discussion of emergency response plans with PPE vendors and pre-submission of emergency orders with suppliers. (See Supplies, Logistics and Support Services module) 					

H. STOCKPILE DEVELOPMENT CONTINUED

	ASSIGNMENT	COMPLETED	IN PROGRESS	NOT STARTED	DATE TO BE COMPLETED	LEAD STAFF MEMBER
2	<p>Assess the need to stockpile antiviral medications for use during a pandemic (see Clinical and HR modules):</p> <ul style="list-style-type: none"> ✓ Identify whether facility will maintain an antiviral stockpile ✓ Develop policy on how medications will be used (i.e. treatment vs. prophylaxis) ✓ Determine who will be prioritized to potentially receive antiviral medications (e.g., critical employees, all employees, employee families, etc.) ✓ Ensure transparent policies regarding stockpiling and distribution of anti-viral medication has been shared with all staff ✓ Ensure funds have been budgeted for purchase of antiviral medications ✓ Determine when antiviral medications would be distributed ✓ Develop plans for distribution of antiviral medications ✓ Practice antiviral distribution plans ✓ Establish employee screening and education programs for those receiving antiviral medications ✓ Ensure coordination of facility antiviral stockpile program with the health department ✓ Develop a plan to receive and utilize state or federal stockpiled medications. Determine who will participate in the process (e.g., security, armed guards, pharmacists, public health officials, etc.) ✓ Develop and exercise process to break down multidose bottles into individual treatment courses (Note: State and federal stockpiled antiviral medications are stored in large multidose bottles and must be broken down into treatment or prophylaxis courses prior to distribution) 					

H. STOCKPILE DEVELOPMENT CONTINUED

	ASSIGNMENT	COMPLETED	IN PROGRESS	NOT STARTED	DATE TO BE COMPLETED	LEAD STAFF MEMBER
3	Ensure facility develops plans to address the need for medical/surgical equipment for use during a pandemic. (See Supplies, Logistics and Support Services module)					
4	Ensure facility develops plans to augment the supply of patient surge related supplies, including: ✓ Linens ✓ Cots ✓ Charts, forms, documents ✓ Admission kits ✓ Disposable plates, cups, utensils ✓ Body bags for the deceased					

I. COMMUNITY ALTERNATE CARE SITES

In your plan, consider the following:

	ASSIGNMENT	COMPLETED	IN PROGRESS	NOT STARTED	DATE TO BE COMPLETED	LEAD STAFF MEMBER
1	<p>Address issues related to risks and liabilities when running an alternate care site. Develop policies surrounding:</p> <ul style="list-style-type: none"> ✓ EMTALA issues on moving patients without performing a complete medical screening exam. (See Legal module) ✓ HIPPA issues on sharing information with alternate care sites outside the facility. (See Legal module) ✓ Liability issues when providing patient care in a non-facility setting (i.e., providing patient care in a location that does not have the usual environment of care and life safety protections in place) ✓ Worker compensation and other worker issues when working in a non-facility setting. (See Legal module) 					
2	Address finance issues related to alternate care sites. (See Finance module)					
3	Address clinical issues related to alternate care sites. (See Clinical Care module)					
4	<p>Address alternate care site logistics and setup policies and procedures (see Clinical Care module), including:</p> <ul style="list-style-type: none"> ✓ Site selection ✓ Staffing ✓ Supply/equipment ✓ Establishing and closing site ✓ Site security 					

J. SECURING THE FACILITY

In your plan, consider the following:

	ASSIGNMENT	COMPLETED	IN PROGRESS	NOT STARTED	DATE TO BE COMPLETED	LEAD STAFF MEMBER
1	Assess security needs to maintain a safe and secure facility in the event of patient surge resulting from pandemic.					
2	Ensure all security policies have been shared with staff.					
3	Ensure staff is trained in lockdown/controlled access policies.					
4	Practice lockdown or controlled access situations.					
5	Ensure all security policies are authorized by facility administration or board of directors.					
6	Develop appropriate signage to facilitate patient flow during a pandemic: <ul style="list-style-type: none"> ✓ Signage for use during a patient surge ✓ Signage reflecting the role the facility will play in the community response ✓ Signage for redirecting patients to alternate sites, screening locations, and/or medication distribution centers ✓ Signage to route patients, ambulances, visitors, staff and vendors/contractors when access to facility buildings is limited 					
7	Determine how facility will augment its security force should there be gaps. This may be accomplished through: <ul style="list-style-type: none"> ✓ Utilizing outside security guards ✓ Agreements with local police ✓ Deputizing staff members ✓ Engaging community groups 					

J. SECURING THE FACILITY CONTINUED

	ASSIGNMENT	COMPLETED	IN PROGRESS	NOT STARTED	DATE TO BE COMPLETED	LEAD STAFF MEMBER
8	Address who will be permitted access during various phases of "lock down" or limited building access. Groups to be considered include patients, patient families, staff, vendors/contractors, etc.					
9	Address facility lockdown issues, including: ✓ Ability to limit access to buildings ✓ Specific triggers for various stages of limiting access to facility buildings ✓ Specific procedures to be followed when implementing various stages of limiting access ✓ EMTALA issues when denying patients access to emergency services by locking down your facility ✓ Integrating volunteers and people enrolled in government-sponsored programs into your facility such as MRC, CERT Teams, ESAR-VHP. (See Clinical Care module).					
10	Define methods for requesting outside assistance or supplies. Collaborate with local law enforcement to refine the procedures used to request additional resources and to gain a better understanding of what law enforcement resources will be available.					
11	Coordinate with community health and emergency management authorities to design government assistance request process(es).					

K. MORTUARY SERVICES

In your plan, consider the following:

	ASSIGNMENT	COMPLETED	IN PROGRESS	NOT STARTED	DATE TO BE COMPLETED	LEAD STAFF MEMBER
1	Develop working relationships with local funeral homes and county/state coroners. Identify emergency procedures to remove deceased from facility, including 24/7 contact information.					
2	Identify procedures that may be needed/changed/waived regarding autopsies and death registration. Ensure changes are reflected in policy and that authorized personnel and procedures have been discussed with all responsible agencies.					
3	Develop procedures to obtain death certificates 24/7 once stock is exhausted.					
4	Establish MOUs with local agencies to assist with deceased storage.					
5	Identify security measures for morgue area.					
6	Develop procedures to disinfect/sanitize/clean morgue surge area. Ensure procedures are created with the assistance of the infection control professional and local health department.					

L. POST-PANDEMIC RECOVERY

In your plan, consider the following:

	ASSIGNMENT	COMPLETED	IN PROGRESS	NOT STARTED	DATE TO BE COMPLETED	LEAD STAFF MEMBER
1	Perform facility capabilities assessment when pandemic wave has passed.					
2	Develop plan and process to allow pandemic activities de-escalation and move to post-pandemic wave operations. This includes: <ul style="list-style-type: none"> ✓ Restarting clinical service lines that were suspended ✓ Restoring administrative functions that were suspended ✓ Addressing outstanding human resources issues ✓ Planning for next pandemic wave ✓ Replenishing supplies and equipment 					
3	Develop plan to address financial recovery: <ul style="list-style-type: none"> ✓ Bill for services rendered ✓ Obtain reimbursement from relevant government entity (may include the Federal Emergency Management Agency (FEMA), HHS, DHS, state government, etc.) ✓ Resolving wage and benefit issues (union and non-union) ✓ Resolving workers compensation issues 					
4	Develop records management policy to limit legal exposure.					
5	Develop process to clean and recover areas used for patient surge to return them to their previous function (e.g, cafeterias, conference rooms, offices, etc.).					

L. POST-PANDEMIC RECOVERY CONTINUED

	ASSIGNMENT	COMPLETED	IN PROGRESS	NOT STARTED	DATE TO BE COMPLETED	LEAD STAFF MEMBER
6	If an alternate care site was established, develop process to safely and efficiently shut down site, keeping in mind that a subsequent pandemic wave may require site to be re-opened.					
7	Collaborate with community health or emergency management planners to develop plan for decommissioned alternate care site.

FY 2008 AND 2009 NIMS IMPLEMENTATION OBJECTIVES FOR HEALTHCARE ORGANIZATIONS

The Incident Management Systems Integration (IMSI) Division, formerly the NIMS Integration Center, in collaboration with the Department of Health and Human Services (HHS) is pleased to announce the release of the *FY 2008 and 2009 NIMS Implementation Objectives for Healthcare Organizations*. On September 16, 2006, IMSI released the FY 2007 NIMS Implementation Activities for Hospitals and Healthcare Systems, which were made up of 17 objectives (activities), of which four were required to be eligible for FY 2007 Assistant Secretary for Preparedness and Response (ASPR) funding by HHS.

IMSI and HHS have received many comments and suggestions regarding the 17 objectives. As a result, a healthcare working group—composed of Federal, State, local, and private sector stakeholders—was stood up to further define the objectives. From the existing objectives, the stakeholders identified 14 activities for FY 2008 and 2009 that clarified language to ensure the 14 objectives are most applicable to healthcare organizations. These implementation objectives are intended for all hospitals regardless of size, location, or financial support.

As with the *FY 2007 NIMS Implementation Activities for Hospital and Healthcare Systems* we continue to strive towards a cohesive working relationship between hospitals and their respective local government, public health, and other emergency management and response agencies. Healthcare organizations are strongly encouraged to coordinate with local public health agencies to work through these implementation activities. The ASPR Program, administered through State Departments of Health, has clearly outlined the components that healthcare organizations are required to meet during the FY 2008 and 2009 funding cycles. Furthermore, developing a relationship with local public health and emergency management agencies enables hospitals and healthcare systems to gain further insight regarding the availability of training as well as capabilities (equipment and procedures) provided by local agencies.

The 14 *NIMS Implementation Objectives for Healthcare Organizations* are as follows:

- **Adoption**
 - Adoption of NIMS
 - Federal Preparedness Awards
- **Preparedness Planning**
 - Revise and Update Plans
 - Mutual-Aid Agreements
- **Preparedness Training and Exercises**
 - IS 700 NIMS, ICS 100 and 200
 - IS 800B NRF (National Response Framework)
 - Training and Exercises
- **Communication and Information Management**
 - Interoperability incorporated into Acquisition Programs
 - Standard and Consistent Terminology
 - Collect and Distribute Information

NIMS *Alert*

June 10, 2008
NA: 07-08
Incident Management
Systems Integration
202-646-3850

- **Command and Management**
 - Incident Command System (ICS)
 - Include Incident Action Planning and Common Communication Plans
 - Adopt Public Information principles
 - Public Information can be gathered, verified, coordinated and disseminated

Questions and comments can be directed to the Incident Management Systems Integration Division at: FEMA-NIMS@dhs.gov or 202-646-3850.

*There is no requirement for healthcare personnel who have completed IS-800A – National Response Plan to also complete IS-800.B – National Response Framework. It is suggested that healthcare personnel complete IS-800.B – National Response Framework in order to be informed of current information regarding response for all levels of government, as well as the private sector. It is the decision of the healthcare organization's administration to issue this requirement to staff.

APPENDIX E- I

BUSINESS IMPACT ANALYSIS DEFINITION

BUSINESS IMPACT ANALYSIS

Business impact analysis (BIA) is a tool that examines your business processes (in this case, your clinical service lines) and looks at all the items that must be in place to ensure you can continue providing that service (upstream dependencies) and looks at all of the people and processes that depend on this service (downstream dependencies). For example, if you choose to maintain your surgical services, the upstream dependencies that would allow you to continue to operate would include electricity, suture materials, sterilization capability, water, etc. Downstream dependencies would include your post-anesthesia care unit (PACU) and the community. In order to maintain this service, you must carefully analyze the upstream dependencies and the downstream dependencies when making the decision to maintain or shut down a clinical service.

APPENDIX E-2

RECOVERY TIME OBJECTIVES DEFINITION

RECOVERY TIME OBJECTIVES

A recovery time objective (RTO) lays out the maximum acceptable downtime for a process. For example, if the clinical registration system goes down, you may have an RTO of one hour to get it back up.

A recovery point objective (RPO) is the maximum amount of allowable data loss following an unplanned IT event, such as a critical disk failure or a flood in your data center. The RPO helps you decide how often you will backup your data. If your RPO is one week, then you could backup up your data once a week so the maximum amount of data you would lose is all data since the last backup. If it is unacceptable to lose any data and your RPO is one millisecond, then you would require a mirrored site so that data is simultaneously present on your primary system and your backup system.
