

Give your business connection continuity

Wireless routers connected to our award-winning network help keep your business ready.

When disruptions hit your primary internet service, they can affect your business's revenue, productivity and reputation. In today's digital economy, maintaining connectivity is vital for your company's success.

Verizon's Backup and Flexible Use Internet helps you maintain your essential business connections with affordable, low-data usage plans. These simple, quick-to-implement plans help keep your critical systems and applications connected and deliver a near-seamless connection for your low-data device needs. They also provide a reliable backup connection when your primary network, whether wired or from another provider, is disrupted.

Get peace of mind.

With Verizon's Backup and Flexible Use Internet, your business doesn't have to skip a beat during network outages. When your primary internet is disrupted, wireless routers on your backup plans connect to the Verizon cellular network. This smooth, dependable backup helps keep your critical applications running, maintaining business continuity and customer satisfaction.

Reliability

Help reduce downtime and productivity losses when primary connections—wireline or from a different provider—are interrupted.

Affordable plans

Backup and Flexible Use Internet makes auxiliary connectivity affordable.

Availability

99% of the U.S. population is covered by our 4G LTE network, so your business can connect virtually anywhere.³

Simplicity

Pair with our easy-to-install standard gateway router with battery backup.

Backup and Flexible Use Internet

- Solutions start as low as \$10/month.¹
- Stay connected on America's most reliable 5G network.²
- A compatible router is required.
